# ECS Accounts Receivable Webinar 10/13/2021

This webinar is intended for any current users of ECS's Accounts Receivable module to show what our system looks like after implementing all programming enhancements. It is also intended for ECS clients who do not currently use ECS's Accounts Receivable module and are interested in seeing how it works.

**Using ECS's AR, AP, & GL modules, means clients can have one complete clinical and financial system!**

## Contact Information

Want more information on the ECS Accounts Receivable module after this demo? Need more information on ECS's Accounts Payable and General Ledger modules? Contact us!

### Email Addresses

- Financial Support: financial@american-data.com

### Phone Number

- General Inquiries/Support: 1-800-464-9942

## Key Points:

- Direct integration with clinical charting to include (but not limited to); Demographics, Face Sheets, Diagnosis Codes, Therapy, Nurse Charting, and MDS. This direct integration reduces duplicate data entry, user error, and time.
- Trust Account module included.
- Customized system based on your Chart of Accounts, services provided, rates billed, reporting needs, and unique workflow.
- Standard 837i and 837p files generated based on the UB04 and HCFA 1500 forms that can be uploaded to any intermediary.
- Customized reporting to include Billing Summary Reports, Medicare Logs, Self Pay Invoices, Trust Account Statements, Aging Reports, and more!
- PDPM Analyzer to allow you to see HIPPS Codes, PDPM reimbursement, Average Daily Reimbursement, and covered days.
- The ability to data enter and/or import ancillary charges.
- The ability to import standard electronic remittance advices (835 files) to make posting payments from any payer quick, easy, and accurate.

- Reporting can be unique per Site/Service offered or combined to see data across your entire continuum of care.
