Pre-Release Date: -	Type: Patch
Official Release Date: 4/28/2020	Support Documentation: What's New 10.1.3.0
Special Instructions: None	

Improvements

The following bugs in versions 10.1.3.2/10.1.3.3 have been corrected:

- If users had not yet received a fix from clinical to be able to successfully save medication orders, this version will correct that problem.
- Question I0020B on the MDS will flag when left blank or when a Return to Provider code is listed.
- False fatal edits -3941 (section A), -3660 (section C), -3926 (section N), -3841 (section K), -3816 (section K), and -3802 (section Z) will no longer trigger incorrectly on the MDS.
- MS specific databases will be able to print past section GG of the MDS.
- If completing a 5-day MDS for purpose of Medicare Replacement and printing section GG utilizing *Other Payer*, all answers will display on the printed form correctly.
- View tasks loaded in ECS mobile with a set number of days for a lookback will display correctly.
- If a client is in multiple different locate filters today, these will now update correctly in ECS Mobile.
- Users are able to successfully utilize the *Send Script* feature to send emails/messages out of ECS.

The following bugs in version 10.1.3.1 have been corrected:

- Users are now able to utilize the *Clients* button on the MDS Transmit screen to create their batch files for transmission.

The following bugs in version 10.1.3.0 have been corrected:

- On a combined PPS Discharge and a discharge tracking MDS, edit number 3924 will no longer trigger incorrectly. Any additional audit errors the user was then presented with when skipping this error have also been corrected.

The following bugs in version 10.1.2.2 have been corrected:

- MDS related fixes:
 - The printout for Section I will accurately display when I0100 has been checked.
 - Section GG skip patterns have been corrected on Medicare Replacement assessments
 - Where the Target Date is displayed in the lower left-hand corner, this will now display in the correct format.
 - NTA comorbidity table has been updated.
 - MDS tables related to COVID-19 that were released on 4/1/2020 have been included (MDS VUT (V3.3.0) and PDPM Grouper (V1.0004)).
- New NCCI Edit Tables effective 4/1/2020 have been included.
- Navigating to American Data – ECS > Help > Videos will no longer produce an error message.
- If a general report task has only Sign Tasks attached, but no Reports, it will now run as intended.
- Printed Journal reports will again have the Site name listed in the footer.
- PDPM Analyzer fixes:
 - Issue with exporting the PDPM Analyzer report has been resolved.
 - Drawing errors have been resolved.
 - The order in which the assessments appear has been changed to display them in chronological order.
- We have increased the speed of loading the Document from Table tasks as well as the import process.

Accessing The Updates

	<p>Updates are available on the Client Sign On portion of our website. (https://www.american-data.com/signon/). Or, if you have the proper user rights, go to Help > Update in ECS. On the Client Sign On page, enter the following information and then click Logon.</p> <ol style="list-style-type: none"> 1.) Facility ID Number. You can find this number in ECS under File > Setup > Settings > Site Settings. The facility ID number is the number in the ID field on the ID tab. 2.) ECS Serial Number. You can find this number on the Authorization screen, which is the first screen that appears after launching ECS. Make sure to include the hyphens (e.g., 0104-2323-00). 3.) Your Name. <p>Once logged into the Client Sign On, click on the Updates tab. Each update will contain the appropriate documentation.</p>

Install Instructions

1. Download the file. Choose **Save to Disk**.
2. Go to the location where you saved the file.
3. Double-click on the file name. This will start the installation and will open ECS Update and a pre-update checklist.
4. Check the path where the file will be installed. This will start the installation process and guide you through the next steps. For example, if ECS is located at J:\ECS, then you should install to J:\ECS. (Change only if necessary).
5. Verify the update path; this should be set by default with typically no need to change this setting.
6. After clicking **Next**, the update begins its automated process, and no user interaction is necessary unless specified or complete.
7. Click **Finish**.
8. (Optional) Any clients using Citrix or Terminal Services should log on to the console of these servers with users still out of ECS and launch ECS as a network admin. This copies the latest program files applied during the update. Once the login screen appears, other users can log back in to ECS.
