

ECS10 User Interface Changes

Converting to ECS10 is a process of moving your database from version 9 to version 10. None of your current setups, workflow processes, tasks, etc. will be adjusted. If you do not currently utilize easy access screens, you will not be utilizing them in ECS10 either (unless your facility requests to receive them via a merge).

This conversion process adjusts the user interface slightly, but the changes are very minimal. These changes are outlined below.

Toolbar Icons

Write Screens

Only the most frequently used buttons are available by default. Select the **More...** button to display additional options.

View Screens

New buttons for **Date From** and **Date To** have been brought onto the main heading to allow you to easily add/remove dates on the fly. You no longer must click into the **Control** button to change dates.

Only the most frequently used options are located on the screen, while the others are concealed under **More...**

Sign Screen (MAR/TAR/Nursing To Do List)

The Control button has instead been renamed to Dates. Less utilized options are concealed under **More...**

Report Selection

The Report Selection will be seen for Graphs, General Reports, and Financial Reports. The **Preview** checkbox will be defaulted to on. Options under Period for **Last Week** and **Current Week** have been removed. The **OK** and **Cancel** buttons have been moved to the bottom right.

Date From and Date To buttons are redesigned for easier date selection.

Overall Changes

- The icons and buttons have been redesigned to have a flat appearance rather than dimensional
- OK and Cancel buttons have been moved to the bottom right corner of many screens.
- Occurrences of the **Run** button have been renamed to **Go**.
- Advanced feature buttons have adopted the More.../Less... convention.
