-Congratulations to

AR, AP, & GL Enhancements and Capabilities in ECS

As promised in our Fall Newsletter, new enhancements in our General Ledger, Accounts Payable, and Accounts Receivable systems have been implemented - and more are on the way!

ECS Accounts Receivable

The ECS Accounts Receivable module is linked directly to your clinical record. Data from Demographics, Face Sheets, Diagnosis, Nurse Charting, MDS, Therapy and more, is used to produce charges, populate invoices and financial forms. Resident records follow them through your continuum of care. ECS's flexible reporting options allow reports to combine data across services or be separated by service. ECS's Financial reports export to Microsoft Excel and can be saved as a PDF. UB04s and 1500s can be batched and sent electronically to any

Neshaminy Mano for receiving a Deficiency-Free DoH survey for the FIFTH year in a row!

intermediary from ECS. Electronic Remittance Advice files can be imported, making payment posting quick, easy, and accurate. ECS's Trust Account module is included and can be used across services. Transactions posted in Accounts Receivable are posted directly to the General Ledger. ECS's integration between your clinical and financial record, increases revenue, reduces the amount of data entry, minimizes the potential for user error, and the time it takes to complete billing. Faster, more accurate, claim generation means faster payments and reduced outstanding Accounts Receivables.

ECS Accounts Payable

The ECS Accounts Payable module uses the concepts of the Accounts Receivable module and applies them to Vendors and Providers, streamlining the learning and workflow of the users. ECS's Accounts Payable module allows for easy invoice data entry and vendor profile information or the ability to import this information. ECS's flexible reporting capabilities allow for customized checks and the ability to see outstanding invoices for one service or all services in your organization. ECS can send payments via paper check or ACH

transactions and payments can be made on your schedule. Accounts Payable transactions post directly to the General Ledger reducing data entry and the potential for error, allowing you to generate accurate, up to the minute, reports within one financial system.

ECS General Ledger

The ECS General Ledger is tied directly to the Accounts Receivable, Trust Account, and Accounts Payable modules eliminating the need to manually enter transactions. ECS's Integration with these modules allows you to efficiently manage all accounting functions in one package. General Journal and Payroll Entries can be entered manually and/or imported. With ECS, budgets can be updated and/or imported based on your account numbers and Fiscal Period. Bank Reconciliation is quick and easy. ECS uses your Chart of Accounts allowing for financial

statements to be customized based on your organization's structure. Detailed transactions can be found by drilling down in any General Ledger report and exporting to Microsoft Excel is standard. ECS provides one complete clinical and financial system.

ECS Tip of the Month

Each month staff at American Data share lesser-known features of ECS to help the charting and billing process go smoothly.

The Ins and Outs of What's New in AR

Has your facility taken advantage of all the enhancements made to your Accounts Receivable module in ECS10? Some key enhancements include, using Show Unbalanced Only on Calendar reports to help you identify who is missing charting, improved functionality of Access Buttons to reduce clicking in View calculations, View UB04s, Reverse Payments, Adjustments, and Apply Credits, improved Medicare (B) UB04 processing for discipline specific coding, improved UB04 and 1500 printing options, new Search functionality within the Receipts/

Adjustments, and more! Reference the What's New Videos on our website to see these changes. Click Here for the What's New document and contact American Data's Financial Support Department (financial@american-data.com) for assistance with these enhancements.

You & Your Residents

July's Featured Facility - Neshaminy Manor!

AD Client since: 2000

Location: Bucks County, PA

Neshaminy Manor is a 360 bed, County owned Skilled Nursing, Subacute/Rehab center located in Bucks County, Pennsylvania. Our history dates back to 1810 when the first Almshouses were created. We are in our fourth building since that time and have come into the modern era in many ways necessitated by the increased acuity of our patient population. The implementation of ECS in 2001 was a critical step in our growth which enabled us to work and communication much more

efficiently. We have been with American Data for **20 years** and deficiency free for the past five consecutive years! ECS is an integral part of every department in this facility – Nursing, Financial, RNACs, Engineering, Consultants, Ancillary departments and Scheduling. 2020 and the COVID situation forced the quick development of other functions within ECS including mass email communication to families and COVID specific charting, tracking and reporting. We are currently working on integrating HL7 connections with our lab and x-ray services. The staff at American Data have all been very responsive, and absolutely wonderful to work with over the years! THANK YOU ALL! Thanks for being a part of the American Data community and a loyal client, Neshaminy Manor!

PET THERAPY FOR YOUR RESIDENTS

- Releases Endorphins
- Reduces Blood Pressure
- Improves Cardiovascular Health
- Increases Physical Activity
- Improves PTSD Symptoms
- And More!

For more info on Pet Therapy or scheduling a visit check out www.therapydogs.com

Congratulations to Neshaminy Manor!

Thanks for providing the highest level of care in your facility!

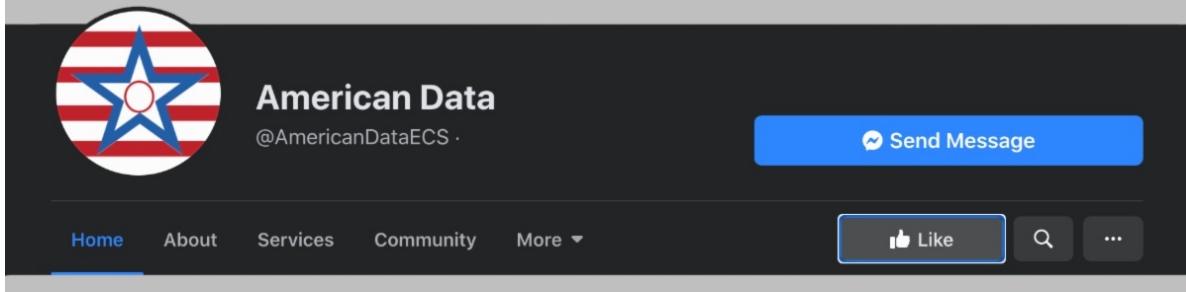

Many ECS Facilities receive perfect surveys. Did your facility? Let us know!
Please let us know of your facility's Deficiency-Free Survey and/or Most Improved Survey so we can share your successes! Send an email to cares@american-data.com.
