

ECS Version 10.1.3.6

Version: 10.1.3.6	Safety Issues: None
Minimum Version Required: 10.1.2.2	Average Expected Down Time: 5-15 Minutes
Pre-Release Date: 6/16/2020	Type: Patch
Official Release Date: 7/1/2020	Support Documentation: -
Special Instructions: None	

Improvements

The following bugs in versions 10.1.3.4 have been corrected:

- A user may now successfully complete a correction MDS on an OSA assessment type.
- The 802 Survey Report will successfully pull any values into a column via the "Use Charting" option.
- The MDS selection screen has been updated to include the Site column again (it had been previously removed in a prior update).
- The user manual has been removed from ECS as it has been replaced with our new Client Sign On website.
- Navigating to American Data – ECS > Help > Forum will take users to the new forum.
- Navigating to American Data – ECS > Help > Videos has been renamed to Client Sign On and will take users to the login page for the Client Sign On.
- Corrected access violation error that users would receive in receipts/adjustments if changing the date paid prior to clicking anywhere else on the screen first.
- If a user has pre-admitted a client into the Locate screen and attempt to discontinue an entry, there were instances where the user was presented with a Site/Service screen. In times when this would occur, the user was unable to select a Site/Service or close the screen. This has been corrected so that a discontinued entry will now just automatically follow the Site/Service of the original entry.

- The following MDS improvements have been made:
 - If correcting an entry tracking record that did not originally have an SSN, the user will now be able to successfully utilize the ^ button.
 - False fatal edits -3924 (section A), -3891 (section GG), -3926 (section N), and -3786 (section J), will no longer trigger inaccurately.
 - Questions O0425A4, O0425A5, O0425B4, O0425B5, O0425C4, and O0425C5 will no longer remain active on item sets they should not be open on.
 - If multiple diagnosis codes fall into the same NTA category, both codes will display on the MDS in the Explain feature.
 - If an MDS has two deleted correction (modification) records, the original MDS was not populating into the PDPM Analyzer. This has been corrected.
 - PPS Discharge MDS assessments completed for purpose of Medicare Replacement will print all Section GG answers correctly.
 - GG0130 and GG0170 discharge questions will remain open if switching the MDS between For Medicare Replacement or making it a standard PPS.
- The following MDS Manager improvements have been made:
 - Speed optimization has been made within the Manager.
 - Users will now be able to change an MDS assessment type if they started an MDS from within the Scheduling Tool portion of the manager.

The following bugs in versions 10.1.3.2/10.1.3.3 have been corrected:

- If users had not yet received a fix from clinical to be able to successfully save medication orders, this version will correct that problem.
- Question I0020B on the MDS will flag when left blank or when a Return to Provider code is listed.
- False fatal edits -3941 (section A), -3660 (section C), -3926 (section N), -3841 (section K), -3816 (section K), and -3802 (section Z) will no longer trigger incorrectly on the MDS.
- MS specific databases will be able to print past section GG of the MDS.
- If completing a 5-day MDS for purpose of Medicare Replacement and printing section GG utilizing *Other Payer*, all answers will display on the printed form correctly.
- View tasks loaded in ECS mobile with a set number of days for a lookback will display correctly.
- If a client is in multiple different locate filters today, these will now update correctly in ECS Mobile.
- Users can successfully utilize the *Send Script* feature to send emails/messages out of ECS.

The following bugs in version 10.1.3.1 have been corrected:

- Users are now able to utilize the *Clients* button on the MDS Transmit screen to create their batch files for transmission.

The following bugs in version 10.1.3.0 have been corrected:

- On a combined PPS Discharge and a discharge tracking MDS, edit number 3924 will no longer trigger incorrectly. Any additional audit errors the user was then presented with when skipping this error have also been corrected.

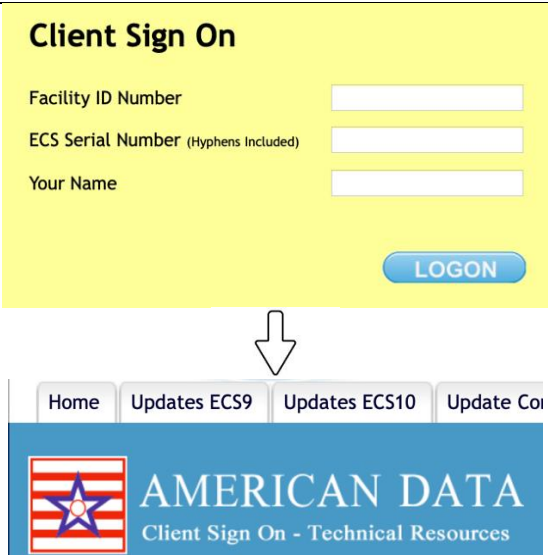

The following bugs in version 10.1.2.2 have been corrected:

- MDS related fixes:
 - The printout for Section I will accurately display when I0100 has been checked.
 - Section GG skip patterns have been corrected on Medicare Replacement assessments
 - Where the Target Date is displayed in the lower left-hand corner, this will now display in the correct format.
 - NTA comorbidity table has been updated.
 - MDS tables related to COVID-19 that were released on 4/1/2020 have been included (MDS VUT (V3.3.0) and PDPM Grouper (V1.0004)).

- New NCCI Edit Tables effective 4/1/2020 have been included.
- Navigating to American Data – ECS > Help > Videos will no longer produce an error message.
- If a general report task has only Sign Tasks attached, but no Reports, it will now run as intended.
- Printed Journal reports will again have the Site name listed in the footer.
- PDPM Analyzer fixes:
 - Issue with exporting the PDPM Analyzer report has been resolved.
 - Drawing errors have been resolved.
 - The order in which the assessments appear has been changed to display them in chronological order.
- We have increased the speed of loading the Document from Table tasks as well as the import process.

Accessing The Updates

	<p>Updates are available on the Client Sign On portion of our website. (https://www.american-data.com/signon/). Or, if you have the proper user rights, go to Help > Update in ECS. On the Client Sign On page, enter the following information and then click Logon.</p> <ol style="list-style-type: none"> 1.) Facility ID Number. You can find this number in ECS under File > Setup > Settings > Site Settings. The facility ID number is the number in the ID field on the ID tab. 2.) ECS Serial Number. You can find this number on the Authorization screen, which is the first screen that appears after launching ECS. Make sure to include the hyphens (e.g., 0104-2323-00). 3.) Your Name. <p>Once logged into the Client Sign On, click on the Updates tab. Each update will contain the appropriate documentation.</p>
--	--

Install Instructions

1. Download the file. Choose **Save to Disk**.
2. Go to the location where you saved the file.
3. Double-click on the file name. This will start the installation and will open ECS Update and a pre-update checklist.
4. Check the path where the file will be installed. This will start the installation process and guide you through the next steps. For example, if ECS is located at J:\ECS, then you should install to J:\ECS. (Change only if necessary).
5. Verify the update path; this should be set by default with typically no need to change this setting.
6. After clicking **Next**, the update begins its automated process, and no user interaction is necessary unless specified or complete.
7. Click **Finish**.
8. (Optional) Any clients using Citrix or Terminal Services should log on to the console of these servers with users still out of ECS and launch ECS as a network admin. This copies the latest program files applied during the update. Once the login screen appears, other users can log back in to ECS.
