SOUTH DAVIS
COMMUNITY HOSPITAL CAMPUS

Congratulations to South Davis Community Hospital for winning the AHCA/NCAL Gold - Excellence in Quality Award!

American Data would like to congratulate South Davis Specialty Care for winning this year's American Health Care Association and National Center for Assisted Living (AHCA/NCAL) **Gold – Excellence in Quality award.**

R. Scott Anderson, RN, chief operating officer, and chief nursing officer for South Davis Specialty Care, share their facility's [second Gold victory](#) in eight years. Winning the award for the second time proves their commitment to becoming the best in the Long Term Care industry.

During his interview in [McKnight's Long Term Care Newsmaker Podcast](#), Anderson says, "If we give employees the appropriate tools, they can perform better." With the help of ECS's customization and flexibility, the facility can create and modify the software to fit the needs of the clients, facility, and their staff to provide the highest standard of care.

We are honored to celebrate South Davis' success in achieving one of the Long Term Care industry's highest awards for the second time! Congratulations to South Davis and their staff.

ECS Updates and Industry News

Accounts Receivable Email Communication

CONTACT US

As we consistently look to improve our process at American Data, we have recognized that using regular mail for Accounts Receivable is not the most efficient process. To continue giving our customers the quickest service and best attention, we will now be conducting all our **accounts receivable communication through email**. This includes sending invoices. By sending invoices through email, we can ensure each invoice includes the necessary information and can be received in a reasonable amount of time for our customers to pay by the due date.

Contact us if you want to apply these changes to your Facility.

MDS Validation Report Warnings

Some of you may be seeing **recalculation warnings** on your validation reports after submitting assessments to CMS via the QIES system. This happens when CMS releases an update to the PDPM Grouper listed in Z0100B that does not line up with our updates. These warnings are not rejections and will not affect your payment rate.

They will resolve without further action once the ECS update is released and applied at your facility.

Fall Flu Vaccines

Fall is the time to provide Flu Vaccine clinics in your facility. **BEFORE** you provide the Flu Vaccine to your residents, ensure that your clinical charting screens are up to date, your staff are trained on charting, and you have updated the fee schedule in ECS.

To do this, determine ahead of time, the vaccine that you will be providing. You need to know the Manufacturer and the Vaccine Name. If you use ECS for billing, you'll also need to know the HCPCS Code and Fee Schedule. Below is a link to the CMS website. When you know which vaccine is being provided, this link will give you the HCPCS and fee schedule for that vaccine.

Make sure your Immunization charting screens have the correct vaccine and that it is clear to your staff which vaccine they should be charting for this year. Before billing, make sure you have updated the fee schedule in ECS.

Ensuring your clinical staff have up to date charting screens, and know how to chart, is essential to making the flow from clinical charting to billing smooth and efficient. If you have any questions on this, please reach out to the [clinical](#) or [financial](#) training departments at American Data.

Update Flu Vaccine Rates - Effective 08/01/2022

Flu Vaccine rates have changed effective 08/01/2022. You need to update your Medicare (B) Fee Schedule in ECS to calculate the correct reimbursement. Flu vaccine rates can be updated using Charge Master or the values tab in word properties. If you need assistance updating the rates or adding new HCPCS codes, please feel free to contact American Data's Financial Support department by emailing financial@american-data.com. Reference the [CMS website](#) with information related to the updated rates.

[CONTACT US](#)

New COVID Booster

American Data is aware new Covid Boosters (Pfizer and Moderna) were approved for administration. If your facility plans to administer the new booster, please reach out to clinical@american-data.com so we can update your immunization topic. The setups will not be billable as long as your facility has had American Data staff build the original Covid-19 immunization words.

If your facility has not yet had us set up the Covid-19 Immunization words, please reach out to

us to get this completed.

Update ICD-10 Code Changes

Update ICD-10 Code Changes - Effective 10/01/2022

The ICD-10 code update is **effective 10/01/2022** and will be updated in ECS. As in the past, the new code breakdown offers greater specificity. The codes are updated regularly, but with this last update the number of changes is considerably larger than is typical. We recommend viewing, discontinuing, and replacing invalid diagnoses codes during the first part of October with an effective date of 10/01/2022. This will help ensure timely payment. Below are instructions on how to view and discontinue invalid codes. If you need assistance, please contact us by emailing clinical@american-data.com

PPS PDPM Rates

PPS PDPM Rates Changing Effective 10/01/2022

PPS PDPM rates will be changing effective 10/01/2022. If you use the ECS Accounts Receivable module, you will want to update your rates in ECS, prior to doing billing for the October 2022 dates of service.

PPS PDPM rates can be entered into ECS to see expected reimbursement on the PPS PDPM Analyzer, even if you are not currently using the ECS Accounts Receivable module. Click the button below for instructions on updating your rates.

New & Notable Clinical Features

Targeted Behavior Monitoring Changes

Behavior Monitoring has evolved.

Simplified creation of targeted behavior plans.

More straight-forward documentation for nurses.

Easier reviewing and reporting.

ECS has made changes to our behavior monitoring process.

- The Targeted Behavior Plan topic has been simplified, displaying all existing behaviors right up front, and making it easier to develop new plans.
- Each behavior has been given its own topic.
 - Viewing the documentation for a specific behavior is easier than ever. Simply grab the topic for that behavior when you choose the topic to view.
 - Creating and using reports is simplified by greatly reducing the need for conditional formulas to pull specified information.
- When documenting from the MAR, users will flip to the specific behavior that they choose, rather than the full list, making accurate documentation more straightforward.

For more information contact American Data's Clinical Department by emailing clinical@american-data.com

Discharge Planning with the VerifyCare Web Version

As residents return home after rehabilitating in your facility, why not charge a fee for your staff to assist the family in monitoring the resident's compliance with your developed home care plan? All your discharged residents can appear on a single dashboard screen where staff can instantly spot those at risk. The family also participates by using the app version of VerifyCare.

Coming in the weeks ahead, the VerifyCare Web Version!

ECS Tip of the Month

Defined Review

The bottom section of a documentation screen in ECS is called the defined review. This area is intended to house a defined set of information that users may need to refer to while completing a specific note or assessment. The defined review is often limited to a specific topic or timeframe. This ensures that necessary information is available, while also helping documentation topics load faster by limiting the volume of information that is brought in. View tasks are the best way to see an inclusive set of documentation for a specific subject. If you find that the defined review portion of your documentation topic is pulling in too much or too little information, please reach out to your system supervisor or American Data's clinical support, so that adjustments can be made.
