

ECS - Electronic Chart System

Flexible Software. Secure System. Quality Care.
That's the American Data way.

American Data's ECS is an Electronic Chart System built upon a strong foundation in Long-Term Care. ECS can be used throughout your entire continuum of care. Together, the components for each care setting provide an integrated patient health record. ECS can be customized to meet the needs of your unique workflow. ECS has a proven record of meeting and exceeding the needs of Long-Term Care facilities nationwide.
